

TEACHING EUROPE CONFERENCE

„Make Europe unite again!” – with LIFELONG LEARNING

As a freshly founded Non-Governmental Organization, our aim is:

- **To advance the UN Sustainable Development Goals** ↑

by placing transformative, lifelong education at the heart of social, cultural, and ecological change.

- **To empower people personally and professionally** 🏃, to express themselves and to participate actively in society through practice-oriented, accessible and sustainable learning spaces.

- **To reduce individual and structural barriers** ↓ so that education becomes low threshold, intrinsically motivating, and meaningfully embedded in everyday life.

- **To connect diverse disciplines, perspectives, and life realities** 🔗, using creative approaches and responsible technologies – including AI – to inspire new thinking and innovative problem-solving.

- **To strengthen the adaptability of communities and organizations** 💪 by including and harnessing diversity, generating positive synergies, and enabling just and future-proof transformation.

**ALL TOGETHER NOW!
LIFELONG LEARNING**

Our Principles of Togetherness reflect the way we want to work and grow – guided by kindness and joy:

1. **We shape the world** 🌍 – all together and with grit, mindful and authentic, now!
2. **We see, trust and enable every individual** 😊, but we think critically and add our needs in an open, friendly and precise way – monologues defocus!
3. **We solve every problem solution-focused** 🔍 by finding similarities and sustainably by including diversity to finally overcome survival of the fittest and clear paths for true human consciousness!
4. **We encourage ourselves to make mistakes** 🙄 but always ask for feedback to uncover new chances for continuous and closely connected growth!
5. **We stop thinking of work as an external burden** 🤦 by exploring and untangling our deepest sensations to follow and share our true passions entirely, balanced and for a lifetime!
6. **We are guests on earth** 🧳, external things – roles, goods, chances, limits, even others' love – are temporary gifts we benefit from, but we may need to let go once they start to occupy our hearts!
7. **We act responsibly, fairly and transparently as one resilient unit** 👁️ to leverage our cognitive and natural resources and to overpower hate and violence with the persistent love of our hearts!
8. **We commit ourselves deeply to principles 1-7** 🙌 to enhance collective well-being and decision-making as dedicated part-time managers for a future that everyone can help shape!

Our long-term goals:

- Hosting global and international **learning conferences for up to one week!** 📅 🏠 🗓️
- Bridging as many people as possible from **every ethnicity, culture and nationality!** 🌍
- Spreading the word of togetherness and love around the globe **to the very corner!** 🌐
- Amplifying shared values with partner organizations to **expand our outreach to the fullest!** 🚀
- Growing **a tight, colorful and glorious mosaic** of warm-hearted and lovely individuals! 💖 💙 💚
- **Cultivating learning at lowest possible threshold to raise pure inner and lifelong motivation!** 💖

Our strategy at a glance:

1. Raise lifelong intrinsic motivation and enable! 💖
2. Bridge perspectives and leverage culture! 🧑🧑🧑
3. Harvest innovative and sustainable growth! 🌱
